

# Proximity Sensors

DC 2-Wire and 3-Wire Models

E2E NEXT Series

# OMRON

7 mm

<2-wire model/M12>

More than double the sensing distance of previous models

## Exceptional sensing range\*

Reduces malfunctions and collisions

**NEW** 3-wire models added

3-wire models standardly ready for IoT

 **IO-Link**

\* Based on September 2017 OMRON investigation.

**Unexpected production facility stoppages:  
70 % are caused by component failures.**

## Proximity sensors account for the most.

Many proximity sensors are used for production facilities due to its environment resistance. The short sensing distance, however, causes collisions with sensing objects, leading to a major cause of facility stoppages.

■ Causes of unexpected production facility stoppages

(Based on September 2017 OMRON investigation.)

With new proximity sensors,

Exceptional sensing range\*  
**7 mm**

2-wire. M12 model

\* Based on September 2017 OMRON investigation.

Even when the distance from a sensing object changes due to equipment deterioration and vibration,

**a proximity sensor  
does not hit equipment  
and facilities work stably!**

Contributes to **better facility "operation rates"**.

**Stable operation**

**Long-distance detection**  
p.4

**Quick recovery**

**Enhanced usability**  
p.6

**Less failures**

**Oil resistance: 2 years**  
p.8

Also allows for **facilities to be more IoT-enabled with greater design flexibility.**

**Greater Flexibility**

**Downsizing**  
p.10

**NEW**  
**IoT-enabled**

**IO-Link\***  
p.12  
\*Standard in 3-wire models

Stable operation

Quick recovery

Less failures

Note: All sensing distances are for 2-wire models.

# Long-distance detection prevents unexpected facility stoppages

New proximity sensors reduce unexpected facility stoppages due to false detection, failures, and damage caused by previous proximity sensors.

3 mm

Previous models

\* for M12

Check the video for the long-distance detection!

<http://www.fa.omron.co.jp/psne>

Approximately double the sensing distance of previous models

Exceptional sensing range\*

### Sensing distance comparison

\* Based on September 2017 OMRON investigation.

NEW

3-wire models deliver even greater sensing distances. Refer to page 35 and after of the datasheet for details.

## Less false detection even when a stationary gets away from the sensor due to equipment vibration.

Spindle presence detection

**Previous models**

The equipment vibration widens the distance between a stationary and a sensor to cause false detection and facility stoppages.

**E2E NEXT**

Long-distance detection enhances the degree of the detection margin. **Stable detection even when stationary gets away.**

\* M12

## When workpiece sitting position varies, collisions are unlikely to happen.

Sitting position confirmation of metal plates to weld

**Previous models**

Workpiece slides and gets closer to the sensor to cause failures and damage due to collisions, and facility stoppages.

**E2E NEXT**

Long-distance detection keeps enough space from the workpiece. **Less collision risks.**

\* M12

### Thermal Distance Control × IoT: technologies for stable long-distance detection

Previously, differences between individual sensors and the influence of temperature changes posed challenges to efforts to increase the sensing distance of proximity sensors. E2E NEXT Series Proximity Sensors solve these issues by implementing Thermal Distance Control technology for stable long-distance detection, and analog digital hybrid ICs.

**DC 2-wire triple distance models (Thermal Distance Control)**

Temperature correction values are written into the analog digital hybrid IC (PROX2) for shipping, which was not possible for previous analog ICs, to minimize the influence of temperature changes on sensing distance.

**NEW** Patent Pending

**DC 3-wire quadruple models (Thermal Distance Control × IoT)**

In-line measurements of each sensor's temperature characteristics are possible in IoT-enabled production processes. Optimal correction values are then calculated based on our unique algorithm and written to the PROX3 analog digital hybrid IC to minimize differences between individual sensors and the influence of temperature change on sensing distance.

**Sensing distance fluctuation due to ambient temperature**

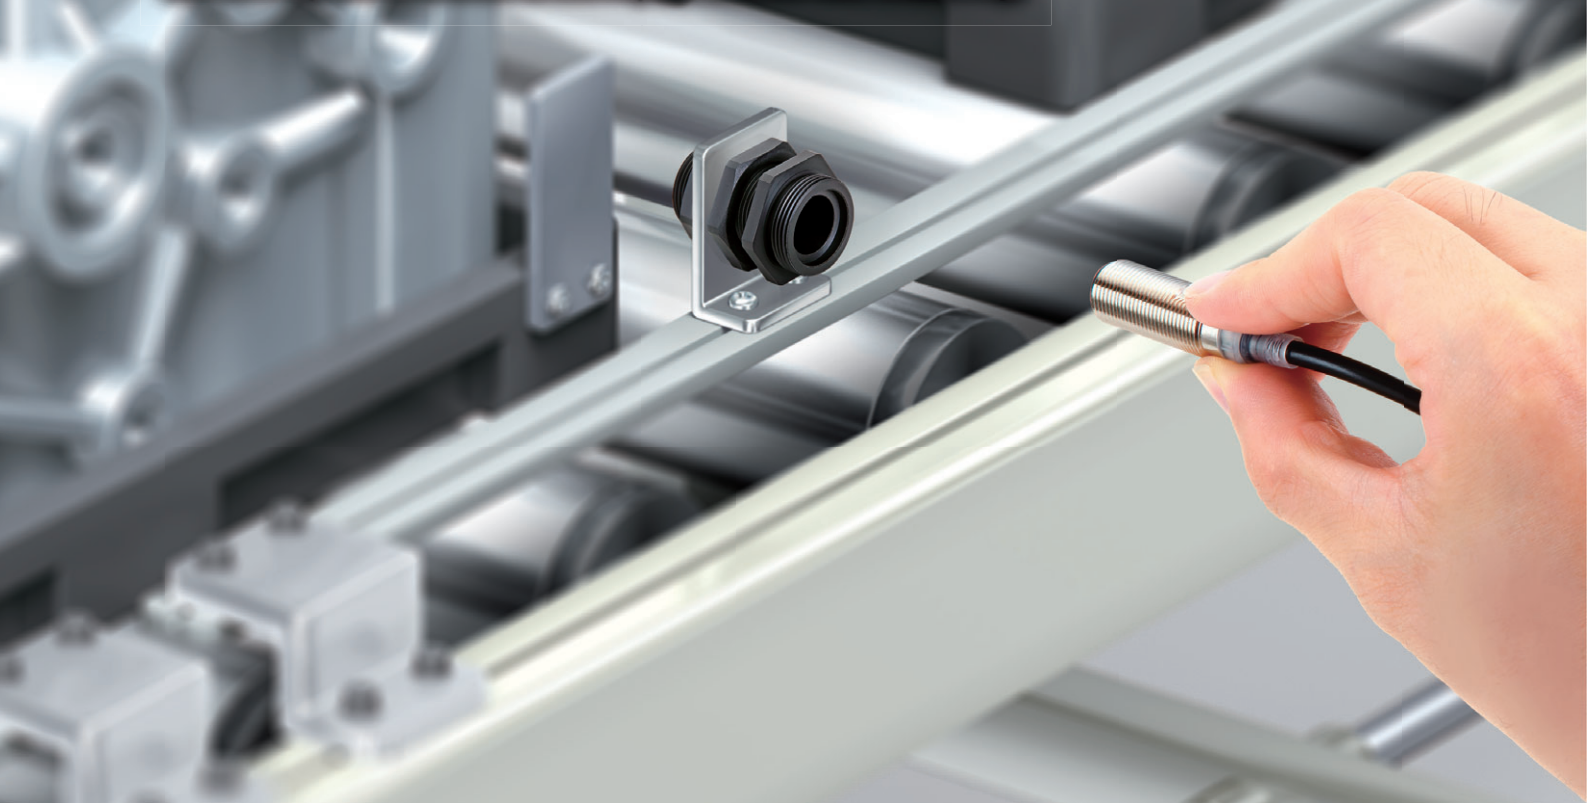

Stable operation

Quick recovery

Less failures

# Enhanced usability enables facilities that can recover in a short time without skill requirements

Less time required from failure to recovery (MTTR: Mean Time To Recovery).

## Indicator can be installed without regard to the orientation.

Previous models

Indicators are invisible depending on the rotation stop position when installing. When it is installed at the back of the facility, confirming accurate detection is difficult.

E2E NEXT

With high-brightness LED, the indicator is visible anywhere from 360° and **it is easy to confirm the detection status.**

Note: The image is of a 2-wire model.

# Replacements in as little as 10 seconds\* using e-jig

Previous models

A lot of time required to adjust to the optimum distance.  
Adjustment position varies depending on the worker's skill and makes detection unstable.

E2E NEXT

Replacement time reduced significantly to **approx. 10 sec.\***  
**Eliminating the need for adjustment allows for installation in the same position by any worker.**

## Easily upgrade existing facilities to enable "10-second\* proximity sensor replacements"

The sensing distance of E2E-NEXT is approximately twice that of previous models. For example, the sensing distance of the M12 models is 7 mm, which is about the same as conventional M18 models. Using these sensors together with the e-jig allows you to easily upgrade your existing facilities so that you can replace their sensors in just 10 seconds.\*

1. Dismount the M18 proximity sensor from the existing facility.

2. Mount an M18-sized e-jig.

3. Insert an E2E NEXT Series M12 Proximity Sensor into the e-jig.

Note: All sensing distances are for 2-wire models.

\* Time required to adjust the distance when installing a sensor. Based on OMRON investigation.

Stable operation

Quick recovery

Less failures

# Components with oil resistance of 2 years<sup>\*1</sup> further reduce unexpected facility stoppages

The sensor reduces further unexpected failures in environments requiring oil resistance in addition to damage caused by collisions.

Unexpected component failures:  
**Approx. 30 %** are caused by cutting oil.

(Based on June 2016 OMRON investigation.)

# Cables with enhanced oil resistance enabled 2-year oil resistance<sup>\*1</sup>.

**Previous models** Cable deterioration due to cutting oil

PUR cables get cracks under environments where water-soluble cutting oil is used.

**E2E NEXT** Verification of 2-year oil resistance<sup>\*1</sup> based on **IP67G** and **OMRON's oil-resistant component evaluation standards**

OMRON's E2E NEXT Series Proximity Sensors use PVC cables with enhanced oil resistance, and have been evaluated according to IP67G of JIS C 0920, and also OMRON's own, even stricter evaluation standards for oil-resistant components.

Oil resistance: **2 years\***

IP67G	
Oil type	N3 (water-insoluble cutting oil)
Evaluation time	48 hours
Evaluation temperature	Room temperature
Dilution concentration	—
Criteria	Appearance and performance

OMRON's Oil-resistant Component Evaluation Standards	
Oil type	A1 (water-soluble cutting oil)
Evaluation time	1,000 hours of machining
Evaluation temperature	55 °C
Dilution concentration	Undiluted

	Yushiroken FGC950PR (YUSHIRO CHEMICAL INDUSTRY CO., LTD.)	A3	—	10.1
Water-insoluble cutting oil	Yushiron Cut Abas BZ224K (YUSHIRO CHEMICAL INDUSTRY CO., LTD.)	N3	10	—
	Yushiron Cut Abas KZ440 (YUSHIRO CHEMICAL INDUSTRY CO., LTD.)	N4	19	—

## Two years<sup>\*1</sup> of stable operation verified for pre-wired connector models as well, using similar oil resistance tests

- Delivers 2-year oil resistance<sup>\*1</sup> by adopting technologies unique to OMRON and PVC cables with enhanced oil resistance. Patent Pending
- Smartclick connector cables block the ingress of cutting oil, and with the same torque, no matter who connects them.

Smartclick is a registered trademark of OMRON Corporation.

For machining processes where the amount of splashing cutting oil is large, **oil-resistant Proximity Sensors E2ER/E2ERZ**

Oil Resistance:  
**4 years**

Cat. No. Y215

<sup>\*1</sup> · Applicable oil types: specified in JIS K 2241:2000  
 “2-year oil resistance” refers to median values (=Typical values) of the product designs and the oil-resistance performance evaluation results. Products to be shipped will have around 2 years of oil resistance; actual oil resistance will vary depending on the product.

· The pre-wired connector model has a verified oil resistance of 2 years when mated with XS5 NEXT series round oil-resistant connectors. This value has not been verified for 3-wire connector models (M1/M3/M5).

<sup>\*2</sup> · pH values recommended by the cutting oil manufacturer are listed.

## Greater Flexibility

Note: All sensing distances are for 2-wire models.

# Downsized sensor enhances flexibility in facility design

Longer sensing distance enables one size smaller sensor with the same sensing distance, so we can add more sensors to an empty space and save space for the installation.

### "Double distance" downsizes the sensors

Exceptional sensing range\*

#### Sensing distance comparison

\* Based on September 2017 OMRON investigation.

## Easy to install in a welding jig.

Previous models

Due to the guide surrounding the welding pin, it is difficult to install a sensor near the pin to check the sitting position.

E2E NEXT

Proximity sensor can be installed in a small space around the welding pin.

With the shorter mutual interference distance, you can install a proximity sensor near the welding pin.

Note: Make sure to factor the influence of surrounding metal into your designs. (Refer to • Influence of Surrounding Metal upon Design on page 29 and page 82 for details.)

## Unifying the model types to reduce the number of parts kept in inventory.

Previous models

Two models (M12 and M18) stocked

E2E NEXT

The extended range of the new sensors allows you to reduce the sensor size from M18 down to M12.

**NEW** IoT-enabled

# With IO-Link, 3-wire models enable early discovery of the site and substance of failures

Using the IO-Link Master to connect sensors supporting IO-Link to your controller enables you to reduce recovery time by discovering the site and substance of failures in real time.

## Sensor failures can be detected in 3-wire 2-output (NO/NC) models as well.

Enables failure discovery by wiring two outputs, NO and NC.

When NO cable is disconnected

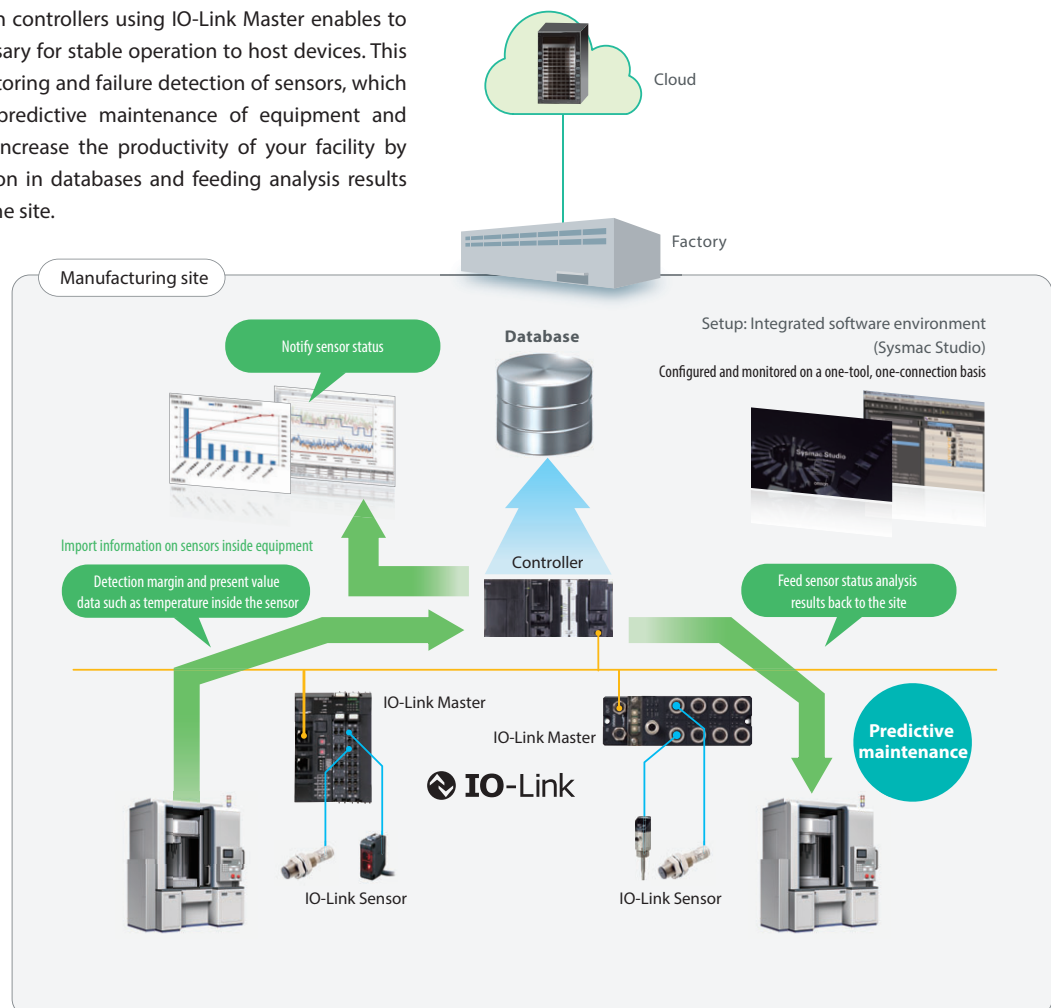

## Enables real-time identification of the site and substance of sensor failure from a single location.

By using the IO-Link Master to connect proximity sensors to your controller, you can use your monitor (HMI) for early discovery of the site and substance of proximity sensor failures.

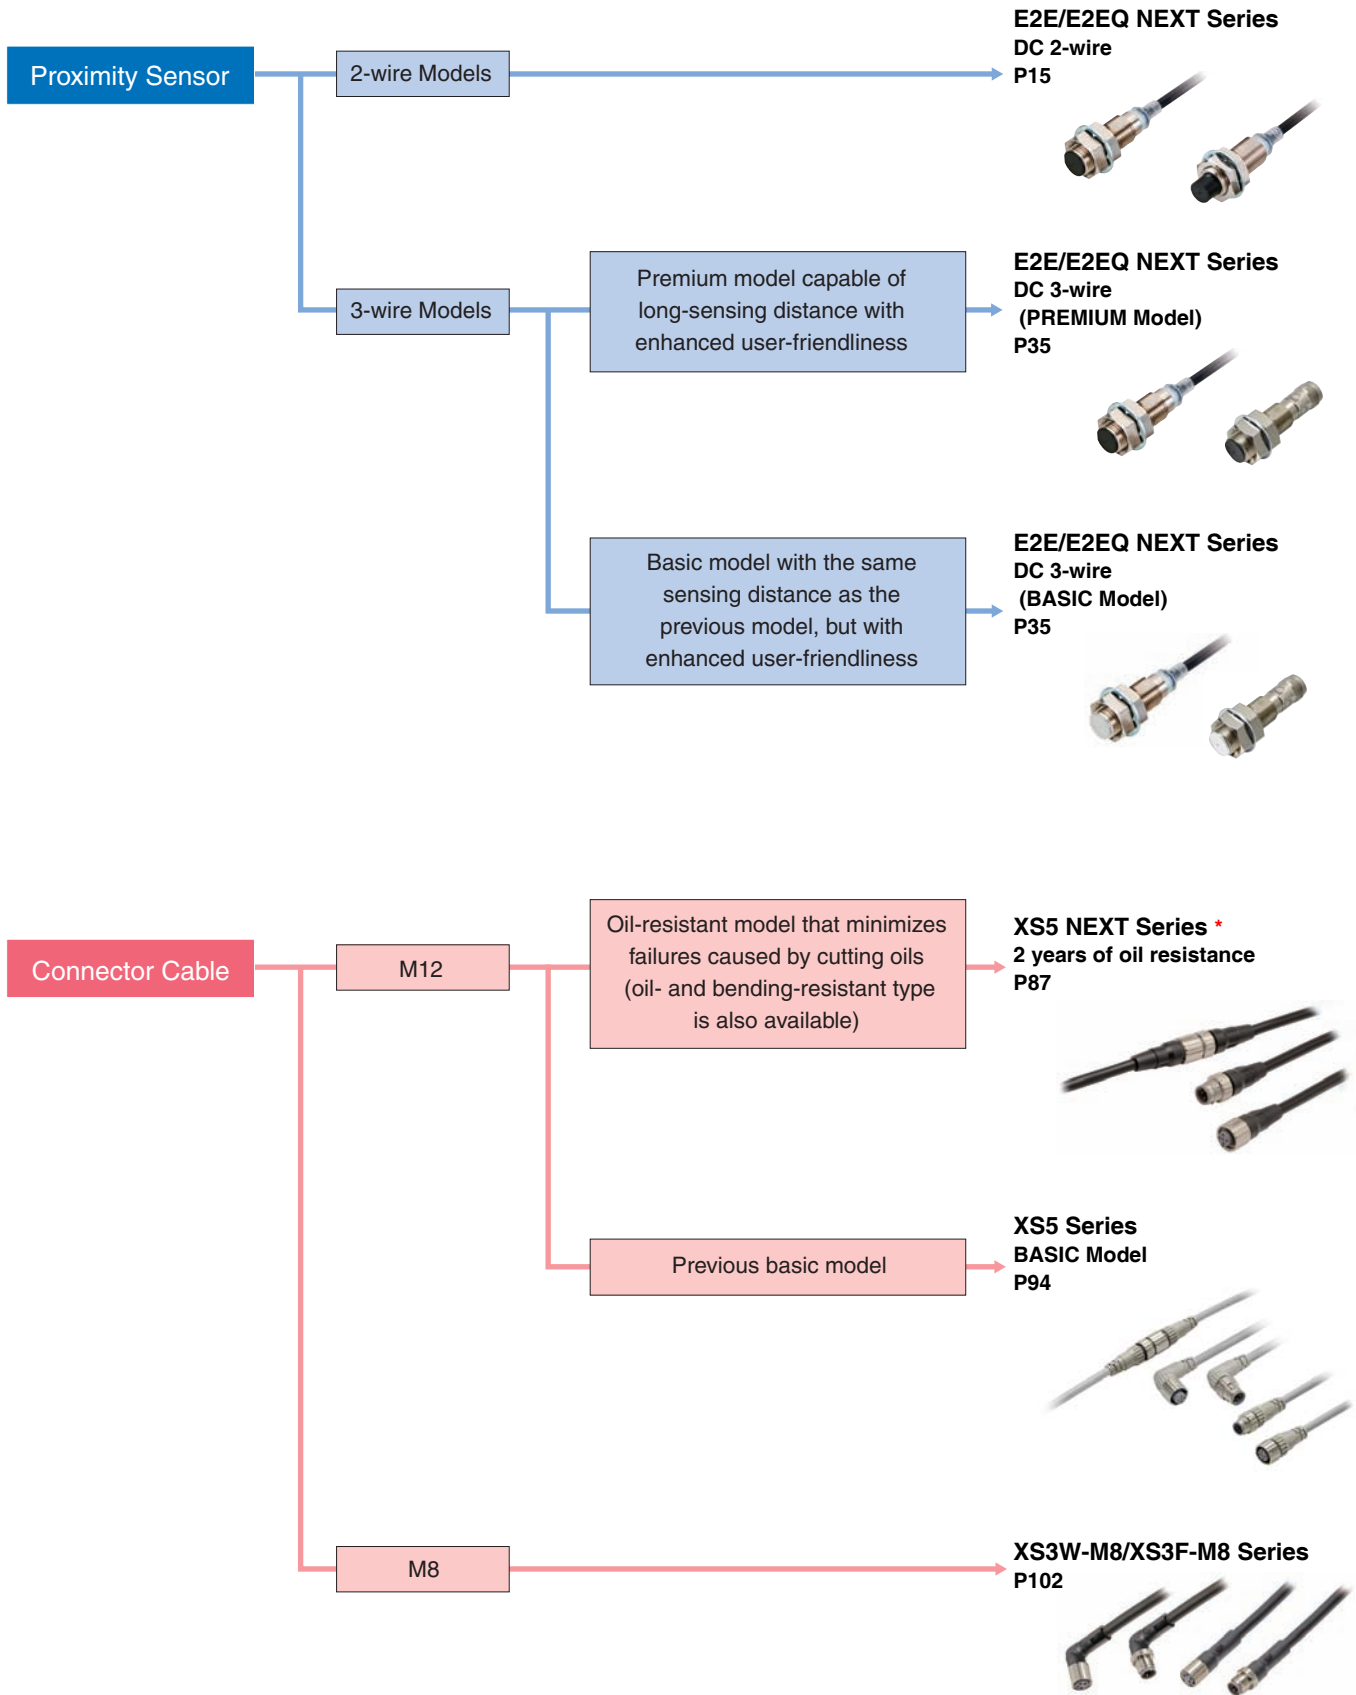

## Enables predictive maintenance through condition monitoring.

Connecting sensors with controllers using IO-Link Master enables to send information necessary for stable operation to host devices. This enables condition monitoring and failure detection of sensors, which in turn contribute to predictive maintenance of equipment and facilities. You can also increase the productivity of your facility by accumulating information in databases and feeding analysis results back to equipment on the site.

# E2E/E2EQ NEXT Series

## Selection Guide

\* Applicable oil types: specified in JIS K 2241:2000

"2-year oil resistance" refers to median values (=Typical values) of the product designs and the oil-resistance performance evaluation results. Products to be shipped will have around 2 years of oil resistance; actual oil resistance will vary depending on the product.

The Pre-wired Connector Model has a verified oil resistance of 2 years when mated with XS5 NEXT Series round oil-resistant connectors.

## Long-distance Detection Prevents Unexpected Facility Stoppages

- The world's longest sensing distance\*<sup>1</sup>  
Nearly double the sensing distance of previous
- With high-brightness LED, the indicator is visible anywhere from 360°.
- Only 10 Seconds\*<sup>2</sup> to Replace a Proximity Sensor with the "e-jig" (Mounting Sleeve).
- Cables with enhanced oil resistance enabled 2-year oil resistance\*<sup>3</sup>.
- UL certification (UL60947-5-2) and CSA certification (CSA C22.2 UL60947-5-2-14)

\*1. Based on July 2017 OMRON investigation.  
\*2. Time required to adjust the distance when installing a Sensor. Based on OMRON investigation.  
\*3. Refer to page 20 and 22 for details. However, E2EQ series is excluded.

 Be sure to read *Safety Precautions* on page 28.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

## E2E/E2EQ NEXT Series Model Number Legend

## Sensor I/O Connectors Oil resistance performance of mating combination

E2E NEXT Series Pre-wired Connector Models	Applicable connector Model	
	XS5 NEXT series	XS5 series
E2E-X□D□-M1TGJ(R)(-T)	2 years of oil resistance*	Water-resistant (IP67)

\* Applicable cutting oil type: specified in JIS K 2241:2000

2 years of oil resistance indicates the median value of the product design and the oil-resistance performance criterion result (=Typical value).  
Products to be shipped will have around 2 years of oil resistance, but will vary depending on the product.

### e-jig (Mounting Sleeves) [Refer to Dimensions on page 34.]

A Mounting Bracket is not provided with the Sensor. It must be ordered separately as required.

Appearance	Model	Applicable Sensors
	Y92E-J8S12	E2E NEXT M8 Shielded Sensors
	Y92E-J12S18	E2E NEXT M12 Shielded Sensors
	Y92E-J18S30	E2E NEXT M18 Shielded Sensors

**Note:** Not applicable for E2EQ NEXT Series (spatter-resistant) models.

<b>Insulation resistance</b>			50 MΩ min. (at 500 VDC) between current-carrying parts and case											
<b>Dielectric strength</b>			1,000 VAC, 50/60 Hz for 1 minute between current-carrying parts and case											
<b>Vibration resistance (destruction)</b>			10 to 55 Hz, 1.5-mm double amplitude for 2 hours each in X, Y, and Z directions											
<b>Shock resistance (destruction)</b>			500 m/s <sup>2</sup> 10 times each in X, Y, and Z directions				1,000 m/s <sup>2</sup> 10 times each in X, Y, and Z directions							
<b>Degree of protection</b>	Pre-wired Models/Pre-wired Connector Models: IP67 (IEC 60529), IP67G *3 (JIS C 0920 Annex 1) Passed OMRON's Oil-resistant Component Evaluation Standards *4 (Cutting oil type: specified in JIS K 2241:2000, Temperature: 35 °C max.) and ISO 20653 (old standard: DIN 40050 PART9) IP69K													
<b>Connecting method</b>	Pre-wired Models (Standard cable length: 2 m) and Pre-wired Connector Models (Standard cable length: 0.3 m)													
<b>Weight (packed state)</b>	<b>Pre-wired Models</b>	Approx. 60 g			Approx. 70 g		Approx. 130 g		Approx. 150 g		Approx. 180 g		Approx. 210 g	
	<b>Pre-wired Connector Models</b>	Approx. 30 g			Approx. 40 g		Approx. 70 g		Approx. 90 g		Approx. 110 g		Approx. 140 g	
<b>Materials</b>	<b>Case</b>	Nickel-plated brass		Stainless steel (SUS303)		Nickel-plated brass								
	<b>Sensing surface</b>	Polybutylene terephthalate (PBT)												
	<b>Clamping nuts</b>	Nickel-plated brass												
	<b>Toothed washer</b>	Zinc-plated iron												
<b>Cable</b>	Vinyl chloride (PVC)													
<b>Accessories</b>	Instruction manual, Clamping nuts, Toothed washer													

\*1. Use the Sensor within the range in which the setting indicator (green LED) is ON (except D2 Models).

\*2. The response frequency is an average value. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.

\*3. The IP67G is the degree of protection which is defined according to the JIS (Japanese Industrial Standards). The IP67 indicates the same level of protection as defined by the IEC, and the G indicates that a device has resistance to oil.

\*4. The Oil-resistant Component Evaluation Standards are OMRON's own durability evaluation standards. 2-year oil resistance indicates the median value of the product design and the oil-resistance performance criterion result (=Typical value). The Pre-wired Connector Model verifies 2 years of oil resistance when mating with Round Oil-resistant Connectors XS5 NEXT series correctly. The degree of protection is not satisfied with the part where cable wires are uncovered for the Pre-wired Models.

## Safety Precautions

Be sure to read the precautions for all models in the website at: <http://www.ia.omron.com/>.

### Warning Indications

<b>⚠ WARNING</b>	<b>Warning level</b> Indicates a potentially hazardous situation which, if not avoided, will result in minor or moderate injury, or may result in serious injury or death. Additionally there may be significant property damage.
<b>Precautions for Safe Use</b>	Supplementary comments on what to do or avoid doing, to use the product safely.
<b>Precautions for Correct Use</b>	Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction or undesirable effect on product performance.

### Meaning of Product Safety Symbols

	<b>General prohibition</b> Indicates the instructions of unspecified prohibited action.
	<b>Caution, explosion</b> Indicates the possibility of explosion under specific conditions.

### ⚠ WARNING

**This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.**

**Risk of explosion. Do not connect sensor to AC power supply.**

### Precautions for Safe Use

The following precautions must be observed to ensure safe operation.

1. Do not use the product in an environment where flammable or explosive gas is present.
2. Do not attempt to disassemble, repair, or modify the product.
3. Do not use a voltage that exceeds the rated operating voltage range. Applying a voltage that is higher than the operating voltage range may result in damage or burnout.
4. Be sure that the power supply polarity and other wiring is correct. Incorrect wiring may cause explosion or burnout.
5. If the power supply is connected directly without a load, the internal elements may explode or burn. Be sure to insert a load when connecting the power supply.
6. Dispose of this product as industrial waste.

### Precautions for Correct Use

Do not use this product under ambient conditions that exceed the ratings.

#### ● Operating Environment

1. Do not install the product in the following locations. Doing so may result in product failure or malfunction.
  - (1) Outdoor locations directly subject to sunlight, rain, snow, water droplets, or oil.
  - (2) Locations subject to atmospheres with chemical vapors, in particular solvents and acids.
  - (3) Locations subject to corrosive gases.
2. The Sensor may malfunction if used near ultrasonic cleaning equipment, high-frequency equipment, transceivers, cellular phones, inverters, or other devices that generate a high-frequency electric field. Please refer to the Precautions for Correct Use on the OMRON website ([www.ia.omron.com](http://www.ia.omron.com)) for typical measures.
3. Laying the Proximity Sensor wiring in the same conduit or duct as high-voltage wires or power lines may result in incorrect operation and damage due to induction. Wire the Sensor using a separate conduit or independent conduit.
4. Never use thinner or other solvents. Otherwise, the Sensor surface may be dissolved.
5. The following conditions shall be observed if you use the product under an environment using cutting oil that may affect product's life and/or performance.
  - Usage under the cutting oil condition designated by the specification
  - Usage under the cutting oil dilution ratio recommended by its manufacturer
  - Usage in oil or water is prohibited
 Impact on the product life may differ depending on the oil you use. Before using the cutting oil, make sure that it should not cause deterioration or degradation of sealing components.

● Design

**Influence of Surrounding Metal**

When mounting the Proximity Sensor using a nut, only use the provided nut. And ensure that the minimum distances given in the following table are maintained.

(Unit: mm)

Type	Item	M8	M12	M18	M30
Triple distance model/ Spatter-resistant Triple distance model E2E(Q)-X□D□(-T) *1	L	0	0	0	0
	d	20	20	50	70
	D	2	4	4	8
	m	9	18	33	60
	n	18	20	54	90
Triple distance model E2E-X□MD□(-T) *2	L	10	16	31	50 *3
	d	30	50	90	170
	D	13	20	35	55
	m	18	30	60	120
Single distance model E2E-X□R5D□(-T) E2E-X5D□(-T) *2	L	0	0	0	---
	d	8	12	18	
	D	0	0	0	
	m	4.5	8	20	
	n	12	18	27	

**Note:** Nuts that are supplied along with each Sensor (\*1, \*2) are different. Refer to *Dimensions* for details on shapes.

\*3. If you use the M30 Triple distance model of Unshielded Model, the panel thickness (t) is 4 mm or less.

When the Proximity Sensor is mounted in metal, ensure that the minimum distances given in the following table are maintained.

(Unit: mm)

Type	Item	M8	M12	M18	M30
Triple distance model/ Spatter-resistant Triple distance model E2E(Q)-X□D□(-T)	l	2	4	4	8
	d	20	20	50	70
	D	2	4	4	8
	m	9	18	33	60
Triple distance model E2E-X□MD□(-T)	l	13	20	35	55
	d	30	50	90	170
	D	13	20	35	55
	m	18	30	60	120
	n	30	50	80	140
	l	0	0	0	---
	d	8	12	18	
	D	0	0	0	
m	4.5	8	20		
	n	12	18	27	

● Mutual Interference

When the Proximity Sensor is embedded in metal, ensure that the minimum distances given in the following table are maintained.

(Unit: mm)

Type	Item	M8	M12	M18	M30
Triple distance model/ Spatter-resistant Triple distance model E2E(Q)-X□D□(-T)	Shielded A	25	40	70	140
	Shielded B	20	30	45	70
Triple distance model E2E-X□MD□(-T)	Unshielded A	80	120	200	380
	Unshielded B	60	100	120	280
Single distance model E2E-X□R5D□(-T) E2E-X5D□(-T)	Shielded A	20	30	50	---
	Shielded B	15	20	35	---

● Mounting

**Tightening Force**

Do not tighten the nut with excessive force. A washer must be used with the nut.

**Note:** 1. The allowable tightening strength depends on the distance from the edge of the head, as shown in the following table. (A is the distance from the edge of the head. B includes the nut on the head side. If the edge of the nut is in part A, the tightening torque for part A applies instead.)  
2. The following strengths assume washers are being used.

**Triple distance model**

Model		Part A		Part B
		Dimension (mm)	Torque	Torque
M8	Shielded	9	4 N·m	10 N·m
	Unshielded	3		
M12	Shielded	16	6 N·m	15 N·m
	Unshielded	9		
M18	Shielded	16	15 N·m	60 N·m
	Unshielded	3		
M30	Shielded	23	40 N·m	80 N·m
	Unshielded	8		

**Spatter-resistant Triple distance model**

Model	Part A		Part B
	Dimension (mm)	Torque	Torque
M8	9	4 N·m	10 N·m
M12	16	6 N·m	15 N·m
M18	16	15 N·m	30 N·m
M30	23	40 N·m	80 N·m

**Single distance model**

Model	Part A		Part B
	Dimension (mm)	Torque	Torque
M8	9	9 N·m	12 N·m
M12	---	30 N·m	
M18		70 N·m

Y92E-J18S30	5 N·m	3.5 N·m

## Enables easier and standardized designs previously not possible

- The world's longest sensing distance\*<sup>1</sup>  
Nearly double the sensing distance of previous
- With high-brightness LED, the indicator is visible anywhere from 360°.
- Only 10 Seconds\*<sup>2</sup> to Replace a Proximity Sensor with the "e-jig" (Mounting Sleeve).
- Cables with enhanced oil resistance enabled 2-year oil resistance\*<sup>3</sup>.
- IP69K compliant for water resistance and wash resistance\*<sup>4</sup>
- Comes in a wide variation to make sensor selection easy
- UL certification (UL60947-5-2)\*<sup>5</sup> and CSA certification (CSA C22.2 UL60947-5-2-14)

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

\*1. Based on December 2018 OMRON investigation.  
 \*2. Time required to adjust the distance when installing a Sensor. Based on OMRON investigation.  
 \*3. Refer to *Ratings and Specifications* for details. However, E2E Connector Models and E2EQ series is excluded.  
 \*4. E2EQ series is excluded.  
 \*5. M8 (4-pin) Connector Models are not UL certified.

Be sure to read *Safety Precautions* on page 81.

## Features

PREMIUM Model

Easy design    Standardized design

Exceptional sensing range\*<sup>6</sup>

**9** [M12] mm\*<sup>7</sup>

The PREMIUM Model, which has a longer detection range compared to previous models, allows for more spacious designs with less risk of contact. It also enables you to standardize your designs by letting you adopt a single one-size model instead of multiple models of different sizes.

\*6. Based on December 2018 OMRON investigation.  
 \*7. Quadruple distance models of M12 sized

Quadruple distance model

9mm [M12]

Triple distance model

6mm [M12]

## New standards for usability

### Early error detection

**1** location, all new E2E Sensors can be monitored with IO-Link IO-Link

### Less unexpected facility stoppages

Strong resistance to cutting oil **2**-year oil resistance\*<sup>9</sup>

### Quick recovery

**10** second replaceable with e-jig (adaptor)\*<sup>8</sup>  
**360°** degree view with high visibility LED indicator

\*8. Time required to adjust the distance when installing a Sensor. Based on OMRON investigation.

\*9. E2E Connector Models and E2EQ series is excluded.

BASIC Model

In addition to our HIGH SPEC Models, we also offer mid/short-distance BASIC Models, to meet various facility design requirement specifications.

Double distance model

4mm [M12]

Single distance model

2mm [M12]

## E2E/E2EQ NEXT Series

\*1. When embedding the Proximity Sensor in metal, refer to *Influence of Surrounding Metal* on page 82.

\*2. Models with 5-m cable length are also available with "5M" suffix. (Example: E2E-X9B1D12 5M)

\*3. Models with 2-m and 5-m robot (bending-resistant) cables are also available with "-R" in the model number. (Example: E2E-X9B1D12-R 2M/ E2E-X9B1D12-R 5M)

\*4. Models with M12 Smartclick connector model robot (bending-resistant) cables are also available with "R" in the model number. (Example: E2E-X9B1D12-M1TJR 0.3M)

**Note: 1.** Models in   are equipped with IO-Link (COM2). For IO-Link (COM3), select a model number with the format of "E2E-X□□□□□" (Example: E2E-X9B1T12 2M).

Operation mode NO can be changed to NC via IO-Link communications.

**2.** IO-Link is not supported for NC-type PNP outputs or all types of NPN outputs.

\*1. When embedding the Proximity Sensor in metal, refer to *Influence of Surrounding Metal* on page 82.

\*2. Models with 5-m cable length are also available (Example: E2EQ-X6B1D12 5M)

**Note:** 1. Models in   are equipped with IO-Link (COM2). For IO-Link (COM3), select a model number with the format of "E2E-X    " (Example: E2EQ-X6B1T12 2M).

Operation mode NO can be changed to NC via IO-Link communications.

2. IO-Link is not supported for NC-type PNP outputs or all types of NPN outputs.

\*1. Models with 5-m cable length are also available (Example: E2E-X8MB1D12 5M)

\*2. Models with 2-m and 5-m robot (bending-resistant) cables are also available with "-R" in the model number. (Example: E2E-X8MB1D12-R 2M/ E2E-X8MB1D12-R 5M)

\*3. Models with M12 Smartclick connector model robot (bending-resistant) cables are also available with "R" in the model number. (Example: E2E-X8MB1D12-M1TJR 0.3M)

**Note: 1.** Models in   are equipped with IO-Link (COM2). For IO-Link (COM3), select a model number with the format of "E2E-X□□□□□" (Example: E2E-X8MB1T12 2M).

Operation mode NO can be changed to NC via IO-Link communications.

**2.** IO-Link is not supported for NC-type PNP outputs or all types of NPN outputs.

## Sensor I/O Connectors Oil resistance performance of mating combination

E2E NEXT Series		Applicable connector Model		
Connecting method	Model	XS5 NEXT Series	XS5 Series	XS3W-M8/XS3F-M8 Series
Pre-wired Connector Models	E2E-X□□-M1TJ(R)	Oil resistant (2 years) *	Water-resistant (IP67)	---
M12 Connector Models	E2E-X□□-M1	Water-resistant (IP67)	Water-resistant (IP67)	---
M8 Connector (4-pin) Models	E2E-X□□-M3	---	---	Water-resistant (IP67)
M8 Connector (3-pin) Models	E2E-X□□-M5	---	---	Water-resistant (IP67)

\* Applicable cutting oil type: specified in JIS K 2241:2000

2 years of oil resistance indicates the median value of the product design and the oil-resistance performance criterion result (=Typical value). Products to be shipped will have around 2 years of oil resistance, but will vary depending on the product.

## e-jig (Mounting Sleeves) [Refer to Dimensions on page 86.]

**A Mounting Bracket is not provided with the Sensor. It must be ordered separately as required.**

Only applicable to standard body-sized E2E NEXT Series Sensors.

Appearance	Model	Applicable Sensors
	Y92E-J8S12	E2E NEXT M8 Shielded Sensors
	Y92E-J12S18	E2E NEXT M12 Shielded Sensors
	Y92E-J18S30	E2E NEXT M18 Shielded Sensors

**Note:** Not applicable for E2E NEXT Series long-body models and E2EQ NEXT Series (spatter-resistant) models.

Materials	Case	Nickel-plated brass							
	Sensing surface	Polybutylene terephthalat (PBT)							
	Clamping nuts	Nickel-plated brass							
	Toothed washers	Zinc-plated iron							
	Cable	Vinyl chloride (PVC)							
Main IO-Link functions*2		Operation mode switching between NO and NC, self diagnosis enabling, excessive proximity judgment distance selecting, timer function of the control output and timer time selecting, instability output (IO-Link mode) ON delay timer time selecting function, monitor output, operating hours read-out, readout of the sensor internal temperature, and initial reset							
IO-Link Communication specifications*2	IO-Link specification	Ver 1.1							
	Baud rate	COM2 (38.4 kbps), COM3 (230.4 kbps)							
	Data length	PD size: 2 bytes, OD size: 1 byte (M-sequence type: TYPE_2_2)							
	Minimum cycle time	COM2: 2.3 ms, COM3: 0.4 ms							
Accessories		Instruction manual, Clamping nuts, Toothed washer							

\*1. The response frequency is an average value. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.

\*2. IO-Link is not supported for NC-type PNP outputs or all types of NPN outputs.

\*3. The Oil-resistant Component Evaluation Standards are OMRON's own durability evaluation standards.

2-year oil resistance indicates the median value of the product design and the oil-resistance performance criterion result (=Typical value).  
The Pre-wired Connector Model verifies 2 years of oil resistance when mating with Round Oil-resistant Connectors XS5 NEXT series correctly.  
The degree of protection is not satisfied with the part where cable wires are uncovered for the Pre-wired Models.

\*4. Weight of the standard body-sized model.

\*5. Both M8 connectors and M12 connectors are available.

Materials	Case	Stainless (SUS303)	Nickel-plated brass			Stainless (SUS303)	Nickel-plated brass		
	Sensing surface	Polybutylene terephthalat (PBT)							
	Clamping nuts	Nickel-plated brass							
	Toothed washers	Zinc-plated iron							
	Cable	Vinyl chloride (PVC)							
Main IO-Link functions*2		Operation mode switching between NO and NC, self diagnosis enabling, excessive proximity judgment distance selecting, timer function of the control output and timer time selecting, instability output (IO-Link mode) ON delay timer time selecting function, monitor output, operating hours read-out, readout of the sensor internal temperature, and initial reset							
IO-Link Communication specifications*2	IO-Link specification	Ver1.1							
	Baud rate	COM2 (38.4 kbps), COM3 (230.4 kbps)							
	Data length	PD size: 2 bytes, OD size: 1 byte (M-sequence type: TYPE_2_2)							
	Minimum cycle time	COM2: 2.3 ms, COM3: 0.4 ms							
Accessories		Instruction manual, Clamping nuts, Toothed washer							

\*1. The response frequency is an average value. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.

\*2. IO-Link is not supported for NC-type PNP outputs or all types of NPN outputs.

\*3. The Oil-resistant Component Evaluation Standards are OMRON's own durability evaluation standards. 2-year oil resistance indicates the median value of the product design and the oil-resistance performance criterion result (=Typical value). Actual performance can be expected to decline after two years on average from shipment. The Pre-wired Connector Model verifies 2 years of oil resistance when mating with Round Oil-resistant Connectors XS5 NEXT series correctly. The degree of protection is not satisfied with the part where cable wires are uncovered for the Pre-wired Models.

\*4. Weight of the standard body-sized model.

\*5. Both M8 connectors and M12 connectors are available.

Main IO-Link functions *2		Operation mode switching between NO and NC, self diagnosis enabling, excessive proximity judgment distance selecting, timer function of the control output and timer time selecting, instability output (IO-Link mode) ON delay timer time selecting function, monitor output, operating hours read-out, readout of the sensor internal temperature, and initial reset							
IO-Link Communication specifications *2	IO-Link specification	Ver 1.1							
	Baud rate	COM2 (38.4 kbps), COM3 (230.4 kbps)							
	Data length	PD size: 2 bytes, OD size: 1 byte (M-sequence type: TYPE_2_2)							
	Minimum cycle time	COM2: 2.3 ms, COM3: 0.4 ms							
Accessories		Instruction manual, Clamping nuts, Toothed washer							

- \*1. The response frequency is an average value. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.
- \*2. IO-Link is not supported for NC-type PNP outputs or all types of NPN outputs.
- \*3. Dual-output specification for the M8-size models is only applicable to long-size M12 Connector models.
- \*4. The Oil-resistant Component Evaluation Standards are OMRON's own durability evaluation standards. 2-year oil resistance indicates the median value of the product design and the oil-resistance performance criterion result (=Typical value). Actual performance can be expected to decline after two years on average from shipment. The Pre-wired Connector Model verifies 2 years of oil resistance when mating with Round Oil-resistant Connectors XS5 NEXT series correctly. The degree of protection is not satisfied with the part where cable wires are uncovered for the Pre-wired Models.
- \*5. Weight of the standard body-sized model.
- \*6. Both M8 connectors and M12 connectors are available.

## PNP output

\*3. The timer function of the control output can be set up by the IO-Link communications. (It is able to select ON delay, OFF delay, or one-shot function and select a timer time of 1 to 16,383ms (T).)

\*4. The excessive proximity diagnosis function can be selected by the IO-Link communications.

\*5. The instability detection diagnosis can be selected by the IO-Link communications.

\*6. The judgment time for the instability detection diagnosis can be selected by the IO-Link communications. (For the ON delay timer function, the setting can be selected from 0 (invalid), 10, 50, 100, 300, 500, or 1000 ms.)

\*7. The judgment distance of the excessive proximity diagnosis function can be selected by the IO-Link communications. (The distance can be selected as a combination of the material of the object detected, such as iron, aluminum, or SUS and the judgment distance of approximately 10, 20, or 30%. However, it is not allowed to select a combination of aluminum and 30%.)

Please contact your OMRON sales representative regarding the IO-Link setup file (IODD file).

Please contact your OMRON sales representative regarding assignment of data.

\*1. For models with IO-Link, the operation mode can be changed by the IO-Link communications.

\*2. If using a model with IO-Link as a general sensor or using a model without IO-Link, it operates in the standard I/O mode (SIO mode).

NPN output

## Safety Precautions

Be sure to read the precautions for all models in the website at: <http://www.ia.omron.com/>.

### Warning Indications

 <b>WARNING</b>	<b>Warning level</b> Indicates a potentially hazardous situation which, if not avoided, will result in minor or moderate injury, or may result in serious injury or death. Additionally there may be significant property damage.
<b>Precautions for Safe Use</b>	Supplementary comments on what to do or avoid doing, to use the product safely.
<b>Precautions for Correct Use</b>	Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction or undesirable effect on product performance.

### Meaning of Product Safety Symbols

	<b>General prohibition</b> Indicates the instructions of unspecified prohibited action.
	<b>Caution, explosion</b> Indicates the possibility of explosion under specific conditions.

 **WARNING**

**This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.** 

---

**Otherwise, explosion may result. Never use the product with an AC power supply.** 

### Precautions for Safe Use

The following precautions must be observed to ensure safe operation.

1. Do not use the product in environments subject to flammable or explosive gases.
2. Do not attempt to disassemble, repair, or modify the product.
3. Do not use a voltage that exceeds the rated operating voltage range.  
Applying a voltage that is higher than the operating voltage range may result in explosion or fire.
4. Be sure that the power supply polarity and other wiring is correct. Incorrect wiring may cause explosion or fire.
5. If the power supply is connected directly without a load, the internal elements may explode or burn.
6. Be sure to insert a load when connecting the power supply.

### Precautions for Correct Use

Do not use the product in any atmosphere or environment that exceeds the ratings.

#### Operating Environment

1. Do not install the Sensor in the following locations.
  - (1) Outdoor locations directly subject to sunlight, rain, snow, water droplets, or oil.
  - (2) Locations subject to atmospheres with chemical vapors, in particular solvents and acids.
  - (3) Locations subject to corrosive gases.
2. The Sensor may malfunction if used near ultrasonic cleaning equipment, high-frequency equipment, transceivers, cellular phones, inverters, or other devices that generate a high-frequency electric field. Please refer to the Precautions for Correct Use on the OMRON website ([www.ia.omron.com](http://www.ia.omron.com)) for typical measures.
3. Laying the Proximity Sensor wiring in the same conduit or duct as high-voltage wires or power lines may result in incorrect operation and damage due to induction. Wire the Sensor using a separate conduit or independent conduit.
4. Never use thinner or other solvents. Otherwise, the Sensor surface may be dissolved.
5. The following conditions shall be observed if you use the product under an environment using cutting oil that may affect product's life and/or performance.
  - Usage under the cutting oil condition designated by the specification
  - Usage under the cutting oil dilution ratio recommended by its manufacturer
  - Usage in oil or water is prohibited
 Impact on the product life may differ depending on the oil you use. Before using the cutting oil, make sure that it should not cause deterioration or degradation of sealing components.
6. When turning on the power by influence of temperature environment, an output mis-pulse sometimes occurs. After the sensor has passed for 300 msec after turning on, please use in the stable state.
7. The sensor is adjusted with a high degree of accuracy, so do not use in the environment with sudden temperature change.
8. Operation check is performed using an OMRON's IO-Link master. If using an IO-Link master from another company, perform the operation check in advance.

# E2E/E2EQ NEXT Series

## Design

### Influence of Surrounding Metal

When mounting the Proximity Sensor using a nut, only use the provided nut. And ensure that the minimum distances given in the following table are maintained.

When mounting the Proximity Sensor using a nut, only use the provided nut. Nuts that are supplied along with each Sensor are different. Refer to Dimensions for details on shapes.

(Unit: mm)

	E2E-X10M□18	200	110
	E2E-X18M□30	300	200

**Mounting**

**Tightening Force**

Do not tighten the nut with excessive force. A washer must be used with the nut.

- Note:**
- The allowable tightening strength depends on the distance from the edge of the head, as shown in the following table. (A is the distance from the edge of the head. B includes the nut on the head side. If the edge of the nut is in part A, the tightening torque for part A applies instead.)
  - The following strengths assume washers are being used.

**Quadruple distance model, Triple distance model, Spatter-resistant Triple distance model**

Size	Shielded	Part A		Part B
		Dimension (mm)	Torque	Torque
M8	Shielded	9	4 N·m	10 N·m
	Unshielded	3		
M12	Shielded	16	6 N·m	15 N·m
	Unshielded	9		
M18	Shielded	16	15 N·m	60 N·m (30 N·m*)
	Unshielded	3		
M30	Shielded	23	40 N·m	80 N·m
	Unshielded	8		

\* If using the E2EQ (M18), refer to this torque value.

**Double distance model, Single distance model, Spatter-resistant Triple distance model, Spatter-resistant Single distance model**

Size	Shielded	Part A		Part B
		Dimension (mm)	Torque	Torque
M8	Shielded	9	9 N·m	12 N·m
	Unshielded	3		
M12	---	---	30 N·m	
M18	---	---	70 N·m	
M30	---	---	180 N·m (100 N·m*)	

\* If using the E2EQ (M30), refer to this torque value.

DC 3-Wire

Pre-wired Model/Pre-wired Connector Model  
Shielded/Unshielded

#### Pre-wired Models

(Operation mode: NO, NC Type)

Vinyl-insulated round cable with  
3 conductors  
M8, M12 size: 4-dia.  
M18, M30 size: 6-dia.  
(Conductor cross section:  
0.2 mm<sup>2</sup> (AWG24),  
Insulator diameter: 1.05 mm),  
Standard length: 2 m

(Operation mode: NO+NC Type)

Vinyl-insulated round cable with  
4 conductors  
M12 size: 4.3-dia.  
M18/M30 size: 6-dia.  
(Conductor cross section: 0.2 mm<sup>2</sup>  
(AWG24),  
Insulator diameter: 1.05 mm),  
Standard length: 2 m

#### Pre-wired Connector Models (M12J)

(Operation mode: NO, NC Type)

Vinyl-insulated round cable with  
3 conductors  
M8, M12 size: 4-dia.  
M18, M30 size: 6-dia.  
(Conductor cross section:  
0.2 mm<sup>2</sup> (AWG24),  
Insulator diameter: 1.05 mm),  
Standard length: 0.3 m

(Operation mode: NO+NC Type)  
Vinyl-insulated round cable with  
4 conductors  
M12 size: 4.3-dia.  
M18, M30 size: 6-dia.  
(Conductor cross section: 0.2 mm<sup>2</sup>  
(AWG24),  
Insulator diameter: 1.05 mm),  
Standard length: 0.3 m

# Round Oil-resistant Connectors (M12 Smartclick) XS5 NEXT Series

## Round Oil-resistive Smartclick Connectors for E2E NEXT Series proximity sensors, that are Resistant to Oil, and that Reduce Installation Work

- Uses unique OMRON technology\*1 and the same PVC cable with increased oil resistance as the E2E NEXT Series proximity sensors. Oil-resistance performance values of 2 years\*2 when used in combination with E2E NEXT Series proximity sensors.
- Oil-resistant robot cables for use with moving parts such as loaders and cableveyors **NEW**
- OMRON's unique lock mechanism (Smartclick) that is compatible with round M12 connectors.
- Simply insert the Connectors, then turn them approximately 1/8 of a turn to lock.
- A positive click indicates locking.
- IP67, IP69K degree of protection.
- UL approved products.

\*1. Patent pending (as of July, 2018)

\*2. Covered types of oil: Cutting oil specified in JIS K 2241:2000

The oil-resistance performance value (2 years) indicates the median value (=Typ) at product design, and in evaluation testing results of oil-resistance performance. Shipped products will show some variance around this 2 year value in actual usage.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

## Features

### Better Cable Oil Resistance, and Improved Overall Oil Resistance with New Rubber Material in Mating Sections

The XS5 NEXT Series uses a special PVC cable that limits deterioration of the cable sheath due to both water-soluble and water-insoluble cutting oil. Omron's proprietary molding technique prevents cutting oil intrusion from mating sections. Moreover, using the same new HNBR/fluoride rubber as in oil-resistant components of connector mating sections helps improve the overall oil resistance.

#### Special PVC Cable + Molding Sealing Method

#### Smartclick Structure + O-ring

#### Patented New Rubber Material Combining and Fluororubber

Hydrogenated nitrile butadiene rubber (HNBR), which provides superior resistance to oil, was blended with fluororubber in a unique OMRON compound to develop a new rubber that provides superior resistance to both swelling and deterioration due to cutting oil. It is used in seals for joints and moving sections that prevent ingress to prevent deterioration and destruction of the seal due to cutting oil, resulting in increased oil resistance performance.

This new material combines the benefits of HNBR and fluororubber

## P67G quality and Omron's Oil Resistance Component Evaluation System for two years of proven oil resistant capability

Oil resistance: **2 years\***

IP67G	
<b>Oil type</b>	N3 (water-insoluble cutting oil)
<b>Evaluation time</b>	48 hours
<b>Evaluation temperature</b>	Room temperature
<b>Dilution concentration</b>	---
<b>Criteria</b>	Appearance and performance

(Illustration)

OMRON's Oil-resistant Component Evaluation Standards	
<b>Oil type</b>	A1 (water-soluble cutting oil)
<b>Evaluation time</b>	1,000 hours of machining
<b>Evaluation temperature</b>	55 °C
<b>Dilution concentration</b>	Undiluted
<b>Criteria</b>	Appearance, performance, and no label text loss

(Illustration)

\* Applicable oil types: specified in JIS K 2241:2000

"2-year oil resistance" refers to median values (=Typical values) of the product designs and the oil-resistance performance evaluation results. Products to be shipped will have around 2 years of oil resistance; actual oil resistance will vary depending on the product.

## Varied product lineup to suit the application

**Fixed Parts** XS5□-D421-□8□-X

Fixed installation

**Moving Parts** XS5□-D421-□8□-XR **NEW**

Installation with moving parts such as loaders and cableveyors

# XS5 NEXT Series

## Ratings and Specifications

Rated current	4 A
Rated voltage	250 VDC
Contact resistance (connector)	40 mΩ max. (at 20 mV max., 100 mA max.)
Insulation resistance	1,000 MΩ min. (at 500 VDC) *1
Dielectric strength (connector)	1,500 VAC for 1 minute (leakage current: 1 mA max.)
Degree of protection	IP67 (IEC60529) IP69K (ISO20653 (formerly DIN Standard 40050 PART9)) OMRON's Oil-resistant Component Evaluation Standards *2 (Cutting oil type JIS K 2241:2000-specification cutting oil, at 35°C or below)
Insertion tolerance	50 times
Lock strength	Tensile: 100 N/15 s, Torsion: 1 N·m/15 s
Cable holding strength	Tensile: 100 N/15 s, Torsion: 1 N·m/15 s
Lock operating force	0.1 to 0.25 N·m
Ambient operating temperature range	-25 to +70°C *3
Ambient humidity range	20 to 85%RH

\*1. State at shipping.

\*2. "OMRON's Oil-resistant Component Evaluation Standards" are OMRON's own durability evaluation standards.

Protection performance with oil-resistive connector (XS5F/W-X) correctly mated.

This performance does not apply if an oil-resistive connector (XS5F/W-X) is missing, and cord wiring is exposed.

\*3. Use the robot cable within a temperature range of 0 to 70°C to avoid the wire breakage when moving.

## Safety Precautions

### Meaning of Display

<b>Precautions for Safe Use</b>	Supplementary comments on what to do or avoid doing, to use the product safely.
<b>Precautions for Correct Use</b>	Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction, or undesirable effects on product performance.

### Precautions for Safe Use

#### Degree of Protection

Do not use the product if its protective capabilities have been compromised, such as through swelling or cracks to housing or seal materials.

If products in this state continue to be used, then cutting oil or other contaminants may enter the product, leading to breakages or damage from fire.

#### Connector Connection and Disconnection

- When connecting or disconnecting Connectors, be sure to hold the Connectors by hand.
- Do not hold the cable when disconnecting Connectors. Check the alignment using the slot in the polarity key.
- Do not wiring the Connector when your hands are wet. Malfunctions or device damage may occur when power is supplied to a device.
- When mating Connectors, be sure to insert the plug all the way to the back of the socket before attempting to lock the Connectors. After you lock a Connector, always confirm that it is mated properly.
- Do not use tools of any sort to mate the Connectors. Always use your hands. Pliers or other tools may damage the Connectors.
- When you replace a Connector, make sure that there is no liquid, cutting oil, or other foreign matter on the mating surfaces before you mate the Connector.

#### Disposal

Dispose of this product as industrial waste.

### Precautions for Correct Use

- Do not use the Connectors in an atmosphere or environment that exceeds the specifications.
  - Always turn OFF the power supply before wiring. Failure to turn OFF the power supply may lead to electric shock or damage to devices.
  - As usage in environments in which cutting oil is used may impact service life and performance, ensure the following requirements are met.
    - Usage with cutting oil requirements as defined in specifications.
    - Usage at a dilution ratio as recommended by cutting oil manufacturers.
    - Usage immersed in oil or water is prohibited.
- The cutting oil used may have a different impact on product service life. Ensure that the product is used only after confirming with the customer that there has been no deformation or deterioration of seal material from the cutting oil.
- The mating coupler will impact the oil-resistance performance values (years). Confirm mating of the couplers before use.

### Mating Combinations

	XS5□R	XS5□-X/XR	Other XS5/ XS2 Series
XS5□R	Oil-resistance performance values 4 years	Oil-resistance performance values 2 years	Water-resistance
XS5□-X/XR	Oil-resistance performance values 2 years	Oil-resistance performance values 2 years	Water-resistance
Other XS5/XS2 Series *	Water-resistance	Water-resistance	Water-resistance

\* Oil-resistant (polyurethane) cable products (XS5F-P, XS5H-P, XS5W-P) as well as oil-resistant (polyurethane) robot cables (XS5F-PR, XS5W-PR) are excluded. Please consult with OMRON for details of these products.

- Environments with corrosive gases and high temperature and humidity can cause bad connections and damage through corrosion, leading to degraded performance, therefore do not use these products in such environments.
- Do not pull on the Connectors or cables with excessive force.
- Do not step on or place any objects on the Connectors. Doing so may damage the Connectors.
- Lay the cable where it will not be stepped on to prevent the wires in the cable from being disconnected and to protect the Connectors from being damaged. If the cable must be placed where it will be stepped on, install a protective cover.
- At installation, if not installing sensors or switches, and not mating plug connectors, then use water-resistant covers (XS5Z-11, XS2Z-11) or dust-resistant covers (XS2Z-13/14/15) in order to ensure correct connector mating.

### Wiring

- Do not wire cables in environments in which the cable terminal sections will be subject to fluids such as water or cutting oil.
- When wiring cables, ensure this is carried out in accordance with the wiring diagram.
- Lay the cables so that external force is not applied to the Connectors. Otherwise, the degree of protection (IP67G) may not be achieved.

### Degree of Protection (IP67)

- The degree of protection of Connectors (IP67) is not for a fully watertight structure. Do not use the Connectors underwater.
- Do not step on or place any objects on the Connectors. Doing so may damage the Connectors.

**Setup**

- Do not install the Connectors with a load placed directly on the joint or at the point where the wires connect to the Connector. The Connector may be damaged or the wires in the cable may be disconnected.
- If bending cables, ensure that these use a minimum bend radius of 40 mm.

**Connecting**

**1. Connecting the XS5 Plug and Socket**

- Align the projection on the plug cover with the polarity key on the socket, then insert the plug all the way in.

- Hold the knurled socket grip, then insert the projection on the plug into the groove of the socket.

- Turn the knurled grips of the socket clockwise approximately 1/8 turn in respect to the plug. A click will indicate that the Connectors are locked. The locking condition can also be confirmed by the alignment marks on the plug and socket.

**2. Connecting the XS5 and XS2**

- Align the projection on the plug cover with the polarity key on the socket, then insert the plug all the way in.
- In the same way as when connecting two XS2 Connectors, screw the knurled grip in the clockwise direction.
- When mating the products to XS2 or other M12 Connectors, tighten the lock to a torque of 0.39 to 0.49 N-m.

## XS5

### Round Water-resistive Smartclick Connectors for E2E NEXT Series proximity sensors that Reduce Installation Work

- A newly developed lock mechanism that is compatible with round M12 connectors.
- Simply insert the Connectors, then turn them approximately 1/8 of a turn to lock.
- A positive click indicates locking.
- IP67 degree of protection.
- UL approved products.

## Safety Precautions

### Meaning of Display

<b>Precautions for Safe Use</b>	Supplementary comments on what to do or avoid doing, to use the product safely.
<b>Precautions for Correct Use</b>	Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction, or undesirable effects on product performance.

### Precautions for Safe Use

#### Degree of Protection

Do not use the product if its protective capabilities have been compromised, such as through swelling or cracks to housing or seal materials.

Breakages or damage from fire may occur when products in this state continue to be used.

#### Connector Connection and Disconnection

- When connecting or disconnecting Connectors, be sure to hold the Connectors by hand.
- Do not hold the cable when disconnecting Connectors. Check the alignment using the slot in the polarity key.
- Do not wiring the Connector when your hands are wet. Malfunctions or device damage may occur when power is supplied to a device.
- When mating Connectors, be sure to insert the plug all the way to the back of the socket before attempting to lock the Connectors. After you lock a Connector, always confirm that it is mated properly.
- Do not use tools of any sort to mate the Connectors. Always use your hands. Pliers or other tools may damage the Connectors.
- When you replace a Connector, make sure that there is no liquid, cutting oil, or other foreign matter on the mating surfaces before you mate the Connector.

#### Disposal

Dispose of this product as industrial waste.

### Precautions for Correct Use

- Do not use the Connectors in an atmosphere or environment that exceeds the specifications.
- Always turn OFF the power supply before wiring. Failure to turn OFF the power supply may lead to electric shock or damage to devices.
- Environments with corrosive gases and high temperature and humidity can cause bad connections and damage through corrosion, leading to degraded performance, therefore do not use these products in such environments.
- Do not pull on the Connectors or cables with excessive force.
- Do not step on or place any objects on the Connectors. Doing so may damage the Connectors.
- Lay the cable where it will not be stepped on to prevent the wires in the cable from being disconnected and to protect the Connectors from being damaged. If the cable must be placed where it will be stepped on, install a protective cover.
- At installation, if not installing sensors or switches, and not mating plug connectors, then use water-resistant covers (XS5Z-11, XS2Z-11) or dust-resistant covers (XS2Z-13/14/15) in order to ensure correct connector mating.

### Wiring

- Do not wire cables in environments in which the cable terminal sections will be subject to fluids such as water or cutting oil.
- When wiring cables, ensure this is carried out in accordance with the wiring diagram.
- Lay the cables so that external force is not applied to the Connectors. Otherwise, the degree of protection (IP67G) may not be achieved.

### Degree of Protection (IP67)

- The degree of protection of Connectors (IP67) is not for a fully watertight structure. Do not use the Connectors underwater.
- Do not step on or place any objects on the Connectors. Doing so may damage the Connectors.

### Setup

- Do not install the Connectors with a load placed directly on the joint or at the point where the wires connect to the Connector. The Connector may be damaged or the wires in the cable may be disconnected.
- If bending cables, ensure that these use a minimum bend radius of 40 mm.

## Connecting

### 1. Connecting the XS5 Plug and Socket

- Align the projection on the plug cover with the polarity key on the socket, then insert the plug all the way in.

- Hold the knurled socket grip, then insert the projection on the plug into the groove of the socket.

- Turn the knurled grips of the socket clockwise approximately 1/8 turn in respect to the plug. A click will indicate that the Connectors are locked. The locking condition can also be confirmed by the alignment marks on the plug and socket.

### 2. Connecting the XS5 and XS2

- Align the projection on the plug cover with the polarity key on the socket, then insert the plug all the way in.
- In the same way as when connecting two XS2 Connectors, screw the knurled grip in the clockwise direction.
- Use your fingers to tighten the Connectors sufficiently.

# XS3W-M8/XS3F-M8

## Small Round Water-resistive Connectors

- Water-resistive, compact connector meets IP67 requirements.
- M8 Screw-on Connectors
- Connectors on both cable ends require no harness work.
- Compliant with IEC61076-2-104
- UL approved products.

Refer to *Safety Precautions* on page 106.

## Model Number Structure

### Model Number Legend

Use this model number legend to identify products from their model number. Use this model number legend to identify products from their model number. When ordering, use a model number from the table in Ordering Information.

## Ratings and Specifications

Item	Model	XS3W-M8/XS3F-M8
Rated current		1 A
Rated voltage		125 VDC
Contact resistance (connector)		40 mΩ max. (20 mV max., 100 mA max.)
Insulation resistance		1,000 MΩ min. (at 500 VDC)
Dielectric strength (connector)		1,000 VAC for 1 min (leakage current: 1 mA max.)
Degree of protection		IP67 (IEC60529)
Insertion tolerance		200 times
Cable tensile strength		49 N/15 s
Ambient operating temperature range		-10 to 80°C
Ambient humidity range		20 to 85%RH

## Materials and Finish

Item	Model	XS3W-M8/XS5F-M8
Contacts		Copper alloy/Gold plating
Fixture		Copper alloy/Nickel plating
Contact block		PBT resin
O-ring		Rubber
Cover		PBT resin
Cable		5 mm dia, AWG23, PVC

## Pin Arrangement (Engaged Side)

Item	Poles	3 poles	4 poles
DC	Male (plug) contacts		
	Female (socket) contacts

## Safety Precautions

### Meaning of Display

<b>Precautions for Safe Use</b>	Supplementary comments on what to do or avoid doing, to use the product safely.
<b>Precautions for Correct Use</b>	Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction, or undesirable effects on product performance.

### Precautions for Safe Use

#### Disposal

Dispose of this product as industrial waste.

### Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings.

#### Connections

- The XS3 and XS2 Sensor I/O Connectors cannot be connected to each other.
- You cannot mate Connectors that have a different number of poles.
- When using Sensors with Connectors or Limit Switches, use the Sensor I/O Connectors specified in the catalog.

#### Connector Connection and Disconnection

- Before connecting or disconnecting Connectors, make sure that no power is being supplied to the Connectors.
- When connecting or disconnecting Connectors, be sure to hold the Connectors by hand. Do not disconnect the Connectors by pulling the cable.
- Do not touch the mating surface of the connectors with wet hands. If there is any water on the Connector or near the Connector, be sure to wipe off the water before connecting or disconnecting the Connector, otherwise the Connector may short-circuit internally or not ensure good insulation.
- Make sure that mating section of any Connector is free of metal dust or power.
- Do not use tools of any sort to mate the Connectors. Always use your hands. Pliers or other tools may damage the Connectors. Be sure to tighten each thread bracket by hand within a torque of 0.2 N·m. If the thread bracket is not tightened securely, the Connector may not maintain its proper degree of protection or the thread bracket may fall off due to vibration.
- When you tighten or loosen a thread bracket, hold onto only the thread bracket.  
If you hold onto the cover or cable, excessive rotational force will be applied to the Connector and may damage it.

#### Degree of Protection

- Do not impose external force continuously on the joints of pin blocks and covers, otherwise the Connectors may not keep its proper degree of protection (i.e., IP67).
- The degree of protection of connectors (IP67) is not for a fully watertight structure. Do not use them underwater.
- The Connectors are not oil-resistant. Do not use them where they would be subject to oil.
- If Connectors are used in places with vibration or shock, secure the mating section of each Connector, otherwise the Connectors may be disconnected or fail to maintain their proper degree of protection.
- Connectors are of resin mold construction. Do not impose excessive force on them.

#### Storage

Do not store Connectors for long periods of time in the following locations

- Locations subject to dust or high humidity
- Locations subject to ammonia gas or sulfide gas

#### Setup

- Do not make any cable bends near the base of the Unit.
- Any bends made must have a minimum radius of 36 mm.

# Terms and Conditions Agreement

## Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

## Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See <http://www.omron.com/global/> or contact your Omron representative for published information.

## Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

## Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

## Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

## Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

## Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

## Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
