NPKV 600	597,5

product description: Supporting profile is used for mounting of cable clamps and thereby for the anchoring of the cables inside the tray.

It finds its use primarily in vertical routes, for the lightening of the cable tension.

It is installed on the bottom of the cable tray and it is fixed by using two bolts NSM 6X10 to the tray sidewalls. To protect the cables, the bolt head is inside the cable tray. A bolt with a GMT surface finish is used for a tray with an F surface finish.

When using a cover it is necessary to take into account the height of the clamps.

configuration: S - Pre-Galvanized, zinc-layer 15 - 27 μm
F - Hot Dip Galvanized, zinc-layer 50 - 100 μm

sales amount: á 1 pc

storage: EN 60721-3-1
