To be competitive in today's digital era, machine builders must be innovative. Smart machines, those that are better connected, more flexible, more efficient, and safe, are enabling machine builders to innovate in ways never before possible.

EcoStruxure, Schneider Electric's open, IoT-enabled architecture and platform, offers powerful solutions for the digital era. As part of this, EcoStruxure Machine brings powerful opportunities for machine builders and OEMs, empowering them to offer smart machines and compete in the new, digital era.

EcoStruxure Machine brings together key technologies for product connectivity and edge control on premises, and cloud technologies to provide analytics and digital services. EcoStruxure Machine helps you bring more innovation and added value to your customers throughout the entire machine life cycle.

**Innovation at Every Level for Machines is full systems across three layers:**

- Connected products  
Our connected products for measuring, actuating, device level monitoring, and control adhere to open standards to provide unmatched integration opportunities and flexibility
- Edge Control  
We are IIoT-ready with a proven set of tested and validated reference architectures that enable the design of end-to-end open, connected, and interoperable systems based on industry standards. Ethernet and OPC UA facilitates IT/OT convergence meaning machine builders reap benefits from web interfaces and cloud.

- Apps, Analytics & Services  
Seamless integration of machines to the IT layer allows the collection and aggregation of data ready for analysis – for machine builders and end users alike this means increased uptime and the ability to find information faster for more efficient operations and maintenance.

**These levels are completely integrated from shop floor to top floor. And we have cloud offers and end-to-end cybersecurity wrapped around.**

EcoStruxure Machine makes it easier for OEMs/ machine builders to offer their customers smarter machines. The advent of smart machines is driven by the changing needs of end users:

- Evolving workforce
- Reducing costs
- Dynamic markets
- Shorter life cycles
- Prioritizing safety and cybersecurity

EcoStruxure Machine provides one solution for the whole machine life cycle:

- With Smart Design & Engineering the time to market is reduced by up to 30% using our automated engineering and the simulation capabilities
- During Commissioning & Operation of the machine, resources such as energy, material and loss can be improved, and with seamless integration to the IT world efficiency can be improved by up to 40%
- Smart Maintenance & Services reduces the time for corrective actions up to 50%

# EcoStruxure™ Machine

\* The Schneider Electric industrial software business and AVEVA have merged to trade as AVEVA Group plc, a UK listed company. The Schneider Electric and Life is On trademarks are owned by Schneider Electric and are being licensed to AVEVA by Schneider Electric.

# EcoStruxure Machine Expert

A single software environment to automate machines

Machine Automation

## Machine Automation

### Machine control

The scalability and consistency of I/O ranges allow you to select the right offer depending on your needs

Embedded Safety provides holistic solutions to Modicon M262 and PacDrive 3 LMC controllers, increasing overall safety demand in Machine Automation

All of those devices are managed within a single software, **EcoStruxure Machine Expert**, a powerful and collaborative engineering environment

- > From basic to motion- and robot-centric machines with the PacDrive 3 offer, Modicon controllers and solutions bring a consistent and scalable response to achieving flexibility, performance, productivity and digitization.
- > Modicon TM3 Optimized I/O system for more compact and modular machines
- > Modicon TM5 for more performance-demanding machines, with Modicon TM7 for harsh environments: Both Performance I/O ranges (Modicon TM5 and Modicon TM7) allow safety functions to be implemented using Modicon TM5CSLC safety logic controller
- > Harmony XPS Universal safety modules cover a wide range of safety functions, suitable for small applications with 4-5 safety functions, with diagnostic information provided to controllers via a single wire connection
- > Modicon TM3 safety functional modules are suitable for small applications covering E-Stop functions and diagnostics via TM3 I/O bus
- > Modicon MCM modular safety controllers are suitable for medium size applications with up to 64 dual channel safety functions and diagnostics via Modbus TCP, Modbus RTU, EtherNet/IP, CANopen, EtherCAT and Profibus
- > EcoStruxure Machine Expert – Safety: an optional addon for programming safety logic controllers
- > EcoStruxure Machine Expert – Basic: a software for programming Modicon M221 logic controllers, an intuitive standalone environment accessible to basic skilled technicians
- > EcoStruxure Machine Advisor: a cloud-based services platform designed for machine builders to track machines in operation worldwide, monitor performance data and resolve exceptional events, while reducing support costs by up to 50%

# EcoStruxure Machine Expert

## A single software environment to automate machines

### Machine Automation

#### Machine Automation

#### Comprehensive Schneider offers for machine builders

- > Lexium servo drives, motors and robotics are designed to control applications ranging from a single independent axis up to high-performance synchronized multi-axis machines requiring high-speed and precise positioning and movements

Robotics

Integrated drives

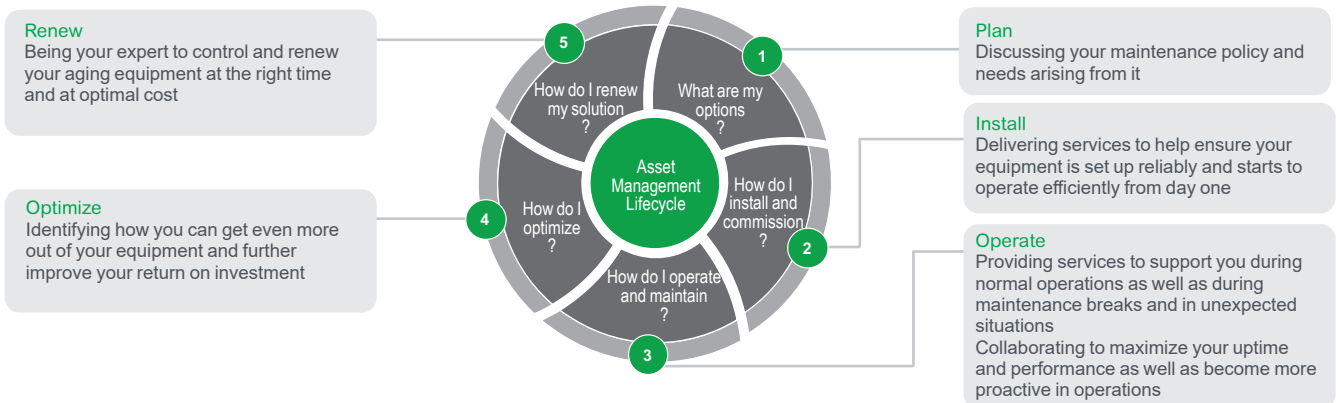

Servo Drives & Motors

Steppers Drives & Motors

- > The Lexium offer is designed for a broad range of motion-centric machines in applications such as [Packaging](#), [Material Handling](#), [Material Working](#), [Food and Beverage](#) and Electronics
- > Schneider Electric has developed Tested Validated & Documented Architectures (TVDA) applicable for generic machine control applications as well as for dedicated segment applications such as Packaging, Material Handling, Material Working, Hoisting, Pumping, or generic [Machine Control applications](#)

#### Choose Schneider Electric to help secure your investment and benefit from worldwide services at every step of your project

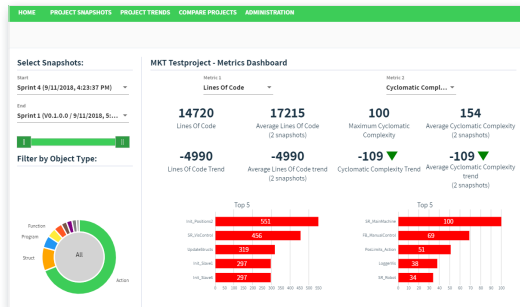

- > From planning and inception to modernization, we help ensure optimal technical and business performance. Our field service engineers combine 30+ years of manufacturer-level experience with the latest technology to bring innovation to every level of our offer and every step of your project.
- > Our machine control dedicated services empower you to maximize your business infrastructure and face increasingly stringent demands on productivity, safety, equipment availability and performance optimization.

### Presentation

#### EcoStruxure Machine Expert software V2.0

EcoStruxure Machine Expert V2.0 is the machine builder's solution software for developing, configuring, and commissioning the entire machine in a single software environment, including logic control, motion control, remote IO systems, safety programming, motor control, and related network automation functions.

EcoStruxure Machine Expert is a single software environment with:

- > One software package
- > One project file
- > One connection
- > One download operation

EcoStruxure Machine Expert is a software environment covering the full engineering lifecycle:

- > Version management
- > Testing
- > Deployment
- > Diagnostics and remote services
- > In addition Machine Expert interfaces with various engineering tools via open interfaces

It supports all the IEC 61131-3 languages, integrated fieldbus configurators, expert diagnostic and debugging functions, motion design as well as multiple capabilities for commissioning, maintenance and visualization.

EcoStruxure Machine Expert is the new name and the next release of the three-engineering software: **SoMachine** and **SoMachine Motion** and **SoSafe Programmable**, now merged into one single environment.

EcoStruxure Machine Expert introduces innovative features for efficient machine development:

- > Collaborative work with SVN client
- > New IoT standard libraries (MQTTs, HTTPs, JSON...) to connect the controller to web APIs our cloud services like EcoStruxure Machine Advisor or third party systems. Project examples and function templates help the usage of these technologies.
- > Machine code analysis to improve coding efficiency, code quality coding consistency in teams and now uses cloud technology to store the evolution of your code quality:
  - Check code convention using standard or customized rules
  - Understand the DNA of the code with structured graphical code exploration and identify critical sections in the code
  - Get metrics with quality indicators
- > Machine Advisor Code Analysis is a cloud based service. It helps you to track deviations from your code quality over the life time of the application. Find more information on our [website](#).
- > New Functional view in the project tree to program machines in a modular way
- > Python programming language interface:
  - Increase Programming Efficiency, by automating development and project generation
  - Integrate **Machine Expert** in the company's individual environment and automatize workflows
- > ETEST framework for higher quality of application code, thanks to automated IEC software unit test
- > Import projects from **SoMachine** and **SoMachine Motion** software
- > Import projects from **SoSafe Programmable** software
- > New HTML5 browser responsive documentation accessible offline or online from any smart device with an internet connection

### HMI programming

EcoStruxure Machine Expert V2.0 embeds:

- > Vijeo Designer to program a wide range of Harmony industrial HMI
- > A Webvisu editor to design and program a visualization screens that are running on the controller's runtime. A controller Webvisu can be accessed remotely via any web browser on many different devices (computers, tablets...)

# EcoStruxure Machine Expert

A single software environment to automate machines

## Presentation

### Configured controllers with EcoStruxure Machine Expert V1.1 software

- > **Motion controllers:** PacDrive 3 LMC Eco/LMC Pro/LMC pro2 (catalog ref. [DIA7ED2160303EN](#))
- > **Logic controllers**
  - Modicon M241 (catalog ref. [DIA3ED2140107EN](#))
  - Modicon M251 (catalog ref. [DIA3ED2140108EN](#))
- > **Logic/Motion controller:** Modicon M262 (catalog ref. [DIA3ED2180503EN](#))
- > **HMI controllers:** Harmony SCU (catalog ref. [DIA5ED2130505EN](#))

### Configured devices with EcoStruxure Machine Expert V2.0 software

Devices can be easily inserted to the project from the Hardware catalog window using simple drag & drop.

- > **Servo drives:** Lexium 28, Lexium 32, Lexium 52 stand-alone, Lexium 62 multi axis, Lexium SD3
- > **Integrated drives:** Lexium ILA/ILE/ILS, Lexium 62 ILM, Lexium 32i, Lexium 62 ILD detached
- > **Robotics:** Lexium STS Scara robots, Lexium T/P Delta robots, Lexium PAS/CAS/TAS/MAX Cartesian robots
- > **I/O systems**
  - Modicon TM3: I/O modules and bus coupler (catalog ref. [DIA3ED2140109EN](#))
  - Modicon TM5: IP20 I/O modules, and fieldbus interface module (catalog ref. [DIA3ED2131204EN](#))
  - Modicon TM7: IP67 I/O blocks (catalog ref. [DIA3ED2140405EN](#))
- > **Safety logic controllers:** Modicon TM5CSLC
- > **HMI:** Harmony GTO standard panels, Harmony GK advanced Touchscreen/Keyboard panels, Harmony XBTH advanced held panels, Harmony GTU high performance modular HMI, Harmony STO compact panels
- > **Variable speed drives:** Altivar Machine ATV320, Altivar Machine ATV340, Altivar Machine ATV600, Altivar Process ATV900, Altivar 71
- > **Sensors:** RFID sensors XG, Vision sensors XUW
- > **Battery-less and wireless pushbuttons:** Harmony XB5R/XB4R (Ø 22 mm)
- > **Connected load management system:** Tesys island

Logic Builder

### Functions

#### Related functions configured with EcoStruxure Machine Expert V2.0 software

#### Hardware related functions can be configured:

- > Discrete, analog I/O: from simple IO to sophisticated features like controller to controller communication.
- > High speed counter (HSC) inputs
- > High speed outputs:
  - Pulse width modulation (PWM)
  - Pulse generator (PLS)
  - Pulse train output (PTO)
  - Frequency generator
- > Communication ports (Ethernet, Sercos, serial links):
  - Ethernet: EtherNet/IP, Modbus TCP client and server, Exchange table
  - Sercos bus
  - Serial links: Modbus RTU or ASCII, ASCII protocol, Display
  - The Modbus Serial IO Scanner and Modbus TCP IO Scanner protocols are used to automatically configure an Altivar variable speed drive, other Schneider devices, or a generic device.

#### Learning, Training and Examples

From the help menu, several tools and links help you to get started with EcoStruxure Machine Expert. This section provides content access to both beginners and advanced users to learn how to use and take advantage of the software:

#### Discover:

- Project examples and their documentation
- Project templates
- How to guides
- Video tutorials to be consulted on [YouTube](#)

#### Project management

#### The project management function is used to:

- > Create a new project from scratch or by using project templates or examples
- > Open a project from the PC (hard disk, CD-ROM, USB flash drive, etc.)
- > Retrieve a project from a controller (logic, safety, motion or motor controller) or a servo drive
- > Open a project from former SoMachine or SoMachine Motion versions
- > Open a Twido or M221 project using conversion tools
- > Print a project as a customized report

It is possible to define additional project specific information properties (company & creator details, project protection information, application information...), attach documents and custom or configuration pictures. The software also supports automatic versioning.

#### Installation

EcoStruxure Machine Expert software can be installed directly from the cloud. Either perform a full installation or select the components you need.

**Machine Expert Installer** downloads the required components only, from Schneider Electric [website](#).

Offline installation from a local folder is also possible.

#### Application Function Block (AFB) libraries for dedicated solutions

EcoStruxure Machine Expert includes application function block libraries for selected machines. Their simple configuration speeds up design, commissioning, installation, and troubleshooting.

These libraries cover the following applications:

-  Packaging
-  Hoisting
-  Handling
-  Pumping
-  Material working

and more ...

Characteristics (Depending on the controller capabilities)		
Feature		Description
IEC 61131-3 programming languages		<ul style="list-style-type: none"> <li>■ IL (Instruction List)</li> <li>■ LD (Ladder Diagram)</li> <li>■ SFC (Sequential Function Chart)</li> <li>■ ST (Structured Text)</li> <li>■ FBD (Function Block Diagram)</li> <li>■ CFC (Continous Function Chart)</li> </ul>

## Presentation

### EcoStruxure Machine Expert software V2.0

EcoStruxure Machine Expert software V2.0 can be downloaded and installed for free, using the [Schneider Electric installer](#).

At the end of a 42-days trial period, a license is required to continue to use EcoStruxure Machine Expert.

- > Some maintenance features remain available and free of access and do not require a license
- > EcoStruxure Machine Expert software is available in 9 languages: English, French, German, Italian, Japanese, Portuguese, Simplified Chinese, Spanish, and Turkish
- > Operating systems for engineering PC: Microsoft Windows® 8.1 Professional 64-bit, Microsoft Windows® 10 Professional 64-bit
- > Documentation is supplied in electronic format: complete online help with complementary documentation in pdf version

## A single software environment to automate machines

Modicon TM5CSLC●00FS safety logic controller

### Presentation

#### EcoStruxure Machine Expert – Safety

**EcoStruxure Machine Expert – Safety** (former SoSafe programmable software) is the software add-on to program Modicon TM5CSLC●00FS safety logic controllers (1). This add-on is to be installed inside the Machine Expert Installer.

Apart from the maintenance features, a dedicated license is required to program this controller.

- > Modicon TM5CSLC●00FS safety logic controllers are suitable for safety applications requiring distributed safety connected to physical input/output devices over Sercos common network and certified up to EN ISO 13849-1 PLe Category 4, and EN/IEC 62061 SIL3.
- > They can be added to PacDrive 3 or in a Modicon M262 Logic/Motion controller architectures.
- > The architectures comprises a PacDrive LMC motion controller or a Modicon M262 Motion controller (Sercos bus masters) and Modicon TM5CSLC safety logic controller (Sercos slave interface).
- > Modicon TM5CSLC safety logic controller manages the safety-related application over the Sercos network.
- > Input/outputs are connected to Sercos network with the use of Modicon TM5 Sercos interface module.
- > Programming: Each hardware component is defined within EcoStruxure Machine Expert environment such as the controller, Modicon TM5 (1) and Modicon TM7 (2) safety I/O modules, Lexium 62 safety servo drives (3), and Lexium 62 ILM integrated drives with optional safety module (4). The application program and configuration of the safety hardware is managed within the EcoStruxure Machine Expert - Safety editor.

Software addons (1)	
<p>&gt; <b>SQL gateway license:</b> To activate the standalone "SQL Gateway" tool – Independent from any STANDARD or PROFESSIONAL license</p>	

The machine can access a database remotely and read or write data with SQL syntax: the controller configured with EcoStruxure Machine Expert has an integrated SQL Client for connecting to one or more databases via the SQL gateway. The SQL gateway runs on Microsoft Windows and is available in 9 languages: English, French, German, Italian, Japanese, Portuguese, Simplified Chinese, Spanish, and Turkish. It includes 42 days trial.

Designation	Reference /number (Type)	
	Printed license	Digital license
<b>License for a single SQL gateway</b>	<a href="#">SOMSQLCZZSPMZZ</a>	<a href="#">SOMSQLCZZSPAZZ</a>
To connect one or more controllers to one or more databases	/1 (Single)	/1 (Single)

<p>&gt; <b>SVN Client license for STANDARD license owners:</b> Included in EcoStruxure Machine Expert PROFESSIONAL license</p>	
<p>SVN acts as a control system for tracking changes to files, folders and directories. It is used to assist in recovering data and recording the history of changes made over time.</p> <p>In addition to detailed recordings of changes and metadata for files and folders, Subversion's features include:</p> <ul style="list-style-type: none"> <li>- Easy implementation of new network functions</li> <li>- Consistent storage and handling of text and binary files</li> <li>- Efficient creation of branches and tags</li> <li>- Easy use with programming languages</li> </ul>

#### Software addons (continued) (1)

> **EEST full license for STANDARD license:** Included in EcoStruxure Machine Expert **PROFESSIONAL** license

EcoStruxure Machine Expert integrates EEST, a powerful innovative tool for improving the IEC program quality of your projects and helping to avoid potential setbacks throughout the life cycle of the machine. The EEST tool is used to program unit tests simply within a EcoStruxure Machine Expert project and to enhance the robustness of the application program. In the **STANDARD** license, EEST framework is available but users are limited to program a maximum number of 5 test cases objects.

The EEST full license add-on allows **STANDARD** license owners to program unlimited number of EEST test cases. The **PROFESSIONAL** license owners can program unlimited number of EEST test cases objects.
