**Altivar Soft Starter ATS480 47A 208 to 690V AC control supply
110 to 230V AC**

Altivar Soft Starter

General information

Representative product	Altivar Soft Starter ATS480 47A 208 to 690V AC control supply 110 to 230V AC - ATS480D47Y
Description of the product	The main function of the Altivar Soft Starter product range is primarily to intend for the soft starting and breaking of the rotational speed of an asynchronous electric motor for heavy duty industry and pumps.
Description of the range	<p>This range consists of products ATS480 with ratings from 17A to 47A for operation on 208 to 690V AC control supply 110 to 230V AC, 3-phase supplies IP20.</p> <p>The environmental impacts of this referenced product are representative of the impacts of the other products of the range which are developed with a similar technology.</p>
Functional unit	The aim of soft starter is to drive an asynchronous motor (squirrel cage) by limitation of the current during acceleration and deceleration phase with a torque control. It's based on three phases dimmer with Silicon controlled rectifier (thyristor). The rating of softstarter is given by nominal current 47 A in the case study which lead to drive several power motor depending of power network voltage ie 230V power motor of 11kW and 690V power motor of 37kW. Calculation of the environmental impacts is based on 10 years of product service lifetime. The usage profile taken into account is 45% uptime in use phase, 45% uptime in stand by phase and 10% uptime in off phase.

Constituent materials

Reference product mass 6,22 kg including the product, its packaging and additional elements and accessories

Plastics	11,8%
Metals	57,4%
Others	30,8%

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

Additional environmental information

The Altivar Soft Starter ATS480 47A 208 to 690V AC control supply 110 to 230V AC presents the following relevant environmental aspects

Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 886,4 g, consisting of cardboard (66%), PE foam (15%), dessicant dryer (9%), paper (8%) and PE film (2%) Product distribution optimised by setting up local distribution centres
Installation	The product does not require any installation operation.
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains Electronic Board (699g), cables (46 g), LCD (7g) and Batteries (2,9g) that should be separated from the stream of waste so as to optimize end-of-life treatment. The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page Recyclability potential: 75% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	10 years			
Product category	Other equipments - Active product			
Installation elements	The disposal of the packaging materials are accounted for during the installation phase (including transport to disposal).			
Use scenario	The product is in active phase 45% of the time with a power use of 152 W, in stand-by phase 45% of the time with a power use of 15 W and in off phase 10% of the time with a power use of 0 W, for 10 years.			
Geographical representativeness	Europe			
Technological representativeness	The main function of the Altivar Soft Starter product range is primarily to intend for the soft starting and breaking of the rotational speed of an asynchronous electric motor for heavy duty industry and pumps.			
Energy model used	Manufacturing	Installation	Use	End of life
	Energy model used: Indonesia	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27

Compulsory indicators		Altivar Soft Starter ATS480 47A 208 to 690V AC control supply 110 to 230V AC - ATS480D47Y					
Impact indicators	Unit	Total	Manufacturing	Distribution	Installation	Use	End of Life

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.9.1, database version 2020-12 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

According to this environmental analysis, proportionality rules may be used to evaluate the impacts of other products of this range.

To extrapolate the impact to another product from the range, apply the following extrapolation rules to each indicator per life cycle stage:

MANUFACTURING(i) = Mass of (product+packaging) in grams / Mass of (reference product+reference packaging) in grams

DISTRIBUTION (i) = Mass of (product+packaging) in grams / Mass of (reference product+reference packaging) in grams

INSTALLATION (i) = Mass of (packaging) in grams / Mass of (reference packaging) in grams

USE (i) = Power dissipated in Watts / Power dissipated of the reference product in Watts

END OF LIFE (i) = Mass of (product) in grams / Mass of (reference product) in grams

TOTAL (i) = Σ Life Cycle Stages (i)

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration number :	SCHN-00616-V01.01-EN	Drafting rules	PCR-ed3-EN-2015 04 02
Verifier accreditation N°	VH39	Information and reference documents	www.pep-ecopassport.org
